

CYBERSECURITY SERVICES

# DNS & Web Content Filtering

Powered By DNS Filter

## Defense Against Online Threats

As part of its cybersecurity suite, Sourcepass provides a DNS & Web Content Filtering solution, DNS Filter, to enhance business security by proactively blocking malicious websites, and reducing the risk of cyber threats and data breaches.

This leads to increased productivity and peace of mind, allowing businesses to focus on growth and innovation without worrying about online threats.

### Business Benefits

- ✓ **Customizable Policies**  
Create and enforce custom access policies based on specific business needs.
- ✓ **Real-Time Threat Detection**  
The solution continuously updates its databases to block newly identified threats.
- ✓ **Reporting & Analytics**  
Provides detailed reports and analytics on internet usage and blocked threats, helping businesses monitor and manage their network security.
- ✓ **Scalability**  
Easily scales to accommodate growing networks and user bases.
- ✓ **Ease of Implementation**  
Easy to deploy and manage, often requiring no additional hardware.

### Highlights

- ✓ Enhanced Security
- ✓ Content Control
- ✓ Improved Network Performance
- ✓ Compliance
- ✓ Reduced Latency
