SOURCEPASS™

CYBERSECURITY SOLUTIONS

Endpoint Protection

Powered by SentinelOne

SOC 2 TYPE II CERTIFIED | AICPA SOC | ISO 27001 Certified

🛡 Next generation threat detection and response.

Our preferred Endpoint Protection / Next Generation Anti-Virus (NGAV) solution, SentinelOne, unifies and extends detection and response capability across multiple security layers including endpoint, cloud, identity, network, and mobile providing centralized end-to-end enterprise visibility, powerful analytics, and automated response.

The Sourcepass Security Operations Center (SOC) monitors and responds to alerts from SentinelOne, with confidence that SentinelOne will automatically block threats allowing time for the SOC team to investigate.

How We Protect Your Endpoints

- 🔒 Prevent and detect attacks across all major vectors

- 🧪 Rapidly eliminate threats with fully automated, policy-driven response capabilities

- Provide complete visibility into the endpoint environment with full-context, real-time forensics

- ✅ Instantly identify and automatically block infections with unknown or stealthy malicious code

⏻ Features

- ☑ Native detection & response

- ☑ Autonomous protective response triggered instantly

- ☑ Ransomware solved with behavioral AI

- ☑ Integrated threat intelligence

- ☑ MITRE ATT&CK Threat Indicators

- ☑ Advanced & Extended Endpoint Detection & Response (XDR)*
*Included with the Advanced Security Add-On
