

SOURCEPASS

CENTER OF EXCELLENCE FOR MICROSOFT

Moving Your Microsoft 365 Licenses from Godaddy

Many companies are choosing to move their Microsoft 365 licenses from GoDaddy to another provider. We hear many concerns about losing data, downtime, and security issues.

At the Sourcepass Center of Excellence for Microsoft, we provide a custom solution that is seamless, quick, and secure. The only impact of moving your Microsoft 365 environment is a required password change for all users.

What We Do

- Our licensing team will review your existing GoDaddy Microsoft 365 licenses.
- We will provide you with a quote and answer any questions you may have.
- Upon your approval, we will transfer everything in your Microsoft 365 environment to Sourcepass.
- All of your users will be asked to do a password reset.

How We Do It

- Sourcepass uses custom transfer tools to move everything in your Microsoft 365 environment via defederation, including your email, files, Teams info, custom configurations and settings to Sourcepass.
- We will validate to ensure everything is complete and transferred.
- Our onboarding team will introduce themselves and welcome you to Sourcepass and communicate all support, billing and Sourcepass contract info to you.

Why Sourcepass?

We make it our business to understand what companies need, simplify processes, protect data, ensure you have the right level of support and offer consultation when it's needed.

Sourcepass is a Microsoft Solutions Partner with a team of certified experts who help companies identify and deploy the right technology at the right time. We are here when you have a simple question, want to change licenses and/or investigate and expand your Cloud journey.

Most importantly, we care. The experience you have with Sourcepass is just as important to use as delivering powerful solutions that help your company be your best.
