# Copilot for Microsoft 365

Innovative productivity, security, and collaboration to drive your business.

## Reinvent Productivity & Accelerate Your Business.

Copilot for Microsoft 365 acts as an AI assistant in your Microsoft 365 apps, documents, and meetings. Because Microsoft Copilot is integrated into the apps you already use, you don't need to switch between different tools or platforms.

You can simply type, speak, or upload an image, and Copilot will provide you with intelligent assistance including suggestions, insights and answers in real time.

**85%** of users found Copilot helps develop faster first draft

**70%** of Copilot users reported higher productivity

**77%** of early users wouldn't want to work without Copilot

### Key Benefits

#### Automation

Save time and effort by automating repetitive and tedious tasks, such as formatting, proofreading, and data entry.

#### Innovation

Boost your creativity and innovation by generating new ideas, suggestions, and content with Copilot's generative AI capabilities.

#### Knowledge Boost & Satisfaction

Improve your skills and knowledge by learning from Copilot's feedback, guidance, and recommendations while also delivering high-quality work that meets your goals and expectations.

#### Enhanced Collaboration

Enhance your collaboration and communication by sharing and accessing relevant information, insights, and documents across your team and organization.

#### Personalized Experience

By understanding your preferences, work habits, and goals, Copilot can tailor its suggestions and assistance to better suit your unique needs giving you more relevant insights, customized recommendations, and a more intuitive interaction overall.
