Advanced Backup

Powered by AvePoint

Advanced Backup for Specialized Environments

Sourcepass offers an advanced backup solution tailored to meet the unique needs of various environments including Microsoft 365 for GCC/GCC-High, FedRAMP-compliant setups, and Salesforce.

By leveraging a robust backup solution powered by AvePoint, Sourcepass can help businesses operating in these specialized environments to maintain data integrity and compliance.

Business Benefits

-  **Data Protection**
Your essential data is protected against loss from various threats like ransomware, user errors, and configuration issues.
-  **Automated & Frequent Backups**
A frequent backup schedule ensures that your data is consistently protected and up-to-date, minimizing data loss in case of an incident.
-  **Secure Backup Storage**
Data is stored securely, meeting compliance and governance requirements, ensuring that your backups are protected against unauthorized access and are compliant with industry standards and regulations.
