Sourcepass Assessments

Maximize Your Growth & Success with Sourcepass Assessments

SOC 2 TYPE II CERTIFIED · AICPA SOC · ISO/IEC 27001

Strategic Guidance, Powerful Results

Sourcepass Assessments provide comprehensive insights into your IT infrastructure, helping you identify strengths and areas for improvement. From creating strategic IT roadmaps and conducting cybersecurity assessments to performing NIST Risk assessments and IT health checks, these evaluations provide robust protection against cyber threats and optimize overall IT performance.

With Sourcepass's extensive experience and expertise, each assessment is meticulously reviewed, strategically planned, and executed with proven precision to deliver exceptional results.

Why Choose Sourcepass?

☑ **Proven Expertise**: Sourcepass brings extensive experience and a track record of successful IT assessments and implementations.

☑ **Comprehensive Solutions**: From IT infrastructure assessments to cybersecurity evaluations, Sourcepass offers a wide range of services tailored to your needs.

☑ **Strategic Planning**: Each assessment is meticulously reviewed and strategically planned to provide optimal performance and robust protection against cyber threats.

Our Assessments Include:

- **IT Health Scorecard**
- **IT Infrastructure Assessment & Roadmap Reports**
- **IT Roadmap**
- **Business Continuity Planning**
- **Cybersecurity Scorecard**
- **Cybersecurity Risk Assessment**
- **NIST Cybersecurity Framework Risk Assessment**
- **FS-ISAC Tabletop Exercise**

Sourcepass Assessments

⏻ Assessment Descriptions

☑ **IT Health Scorecard:** Our Pre-Sales IT Scorecard helps identify strengths, vulnerabilities, and priorities in security and IT operations for optimal business continuity and resilience.

☑ **IT Infrastructure Assessment & Roadmap Reports:** Our IT Infrastructure Assessment & Roadmap provides a strategic view of your IT operations, identifying improvements to reduce risk, boost performance, and support growth. With this expert-driven evaluation of your IT landscape, you get actionable, executive-ready outcomes.

☑ **IT Roadmap:** Sourcepass partners with you to create a tailored IT roadmap through comprehensive assessments, benchmarking, targeted recommendations, transition planning, and budgeting to enhance strategic alignment, optimize performance, reduce risks, and support long-term growth.

☑ **Business Continuity Planning:** Our experts provide guidance to create a strong Business Continuity Plan promoting business continuity during disruptions with clear objectives, emergency steps, roles, contacts, data backup, and safety protocols.

☑ **Cybersecurity Scorecard:** We assess your cybersecurity across people, endpoints, infrastructure, and brand, covering antivirus, email security, DNS filtering, vulnerability management, compliance tracking, and risk remediation planning.

☑ **Cybersecurity Risk Assessment:** We collaborate with your team and vendors to evaluate security, policies, disaster recovery, and risks, providing a final report with prioritized recommendations to help improve your cybersecurity posture.

☑ **NIST Cybersecurity Framework Risk Assessment:** We develop a tailored cybersecurity strategy, establish clear policies, receive actionable insights, and manage risks holistically. And, continually evaluate against NIST CSF 2.0 for ongoing improvement.

☑ **FS-ISAC Tabletop Exercise:** The tabletop exercise covers procedural, organizational, and technical observations, fostering team collaboration, identifying vulnerabilities, improving response plans, and enhancing resilience.
