

Sourcepass Service Principle: Confident Control

Confident Control

Whether simple or complex, your technology solutions will run seamlessly. You'll have a real-time dashboard that provides fast and understandable information and a self-service portal that allows you to perform frequent tasks like adding a new employee to the network or ordering equipment, rather than being dependent on an IT provider the way you are now.

Control Your Digital Universe. Transform Your Business.

Complex technology needs require an understanding of managed solutions that protect your business. From breach and vulnerability response to assessing risk compliance, and everything in between, Sourcepass is there to advise you and ensure you know where you stand. Our knowledge and expertise will support you, while you remain in control.

Part of that control lies within our industry-leading platform, called **Quest**, provided to empower clients to take control of their technology and drive their own success through a modern experience.

With Quest, Clients Can:

- Perform Self-Service Tasks For End Users (e.g., new user onboarding, view critical IT messages, etc.)
- Access the Quest Portal From Anywhere (e.g., Desktop, Web, Mobile)
- Have a Centralized Location for Streamlined Operations (e.g., submit new sales orders, pay invoices, etc.)

Sourcepass puts you in control of your digital universe by providing the right blend of technologies working seamlessly and powerfully, enabling you to transform your business. To discuss receiving an IT experience that our client's love, please call us at (877) 678-8080 or visit us at www.sourcepass.com.
