CERTIFIED

Introduction

Carle Place Union Free School District (UFSD) was established in 1915 and serves all of Carle Place and parts of Westbury and Mineola, in central Nassau County, NY. The school district consists of 3 public schools, about 1,450 students, 151 teachers, and 221 staff members.

Challenge

After a past natural disaster left the UFSD operations struggling to conduct normal business (i.e., paying bills and salaries) and relying on generator power with limited access to facilities for over a week, the district decided to update its Disaster Recovery plan and solution.

The UFSD wanted a solution that would allow replication to the Cloud so that business operations could continue in the event of a disaster. The UFSD needed to find an IT service provider that:

- Had a unique understanding of the K-12 market
- Strong experience in designing innovative Cloud-based solutions

Our Approach

Sourcepass GOV has a unique understanding of the K-12 market, recognizing the specific needs and challenges faced by educational institutions. With a strong focus on creating safe, efficient, and engaging learning environments, Sourcepass GOV leverages its extensive experience to design innovative cloud-based solutions tailored for K-12 schools.

Sourcepass GOV's solutions enhance collaboration, streamline administrative processes, and ensure secure access to educational resources. Sourcepass GOV knew they could help the UFSD by implementing cutting-edge technology to help maximize the UFSD's IT investments, improve student outcomes, and adapt to the evolving demands of modern education.

Solution

SourcepassGOV was able to:

- ✓ Determine the pain points and challenges the UFSD was having and how to resolve them
- ✓ Provide the UFSD with a unique, customized solution to protect its systems.

By implementing a Disaster Recovery as a Service (DRaaS) solution, the UFSD can launch as many custom workstations as needed, on demand, in the Microsoft Azure Cloud. This assures that monthly pricing is minimal, and workloads are only used during a disaster. In the event of a disaster, Azure Site Recovery replicates the systems data to the Cloud and the UFSD can continue business as usual within 30 minutes of a disaster declaration. And, once the disaster ends, all the changed data is replicated back to the UFSD.

“

The whole Sourcepass GOV team was respectful and very knowledgeable. They are experienced and worked quickly to get the project completed. The final result was exactly what we needed.

*-Richard Greenberg, Executive Director of Technology,
Carle Place UFSD*

”

Conclusion

Sourcepass GOV implemented the DRaaS solution to the UFSD and in the event of a disaster or emergency, normal business functions of paying bills and salaries will not be a problem. Critical servers and customer workstations will be back up and running within 30 minutes of a disaster declaration.

Sourcepass GOV provides the technical expertise, strategic guidance, and impactful technology solutions to provide a modern, secure, cloud-enabled approach. Start your journey today by visiting us at www.sourcepassgov.com.
