CYBERSECURITY SOLUTIONS

Vulnerability Scanning

Identify Security Vulnerabilities to Reduce Risk

SOC 2 TYPE II CERTIFIED · AICPA SOC · ISO 27001 Certified

Reduce Risk with Continual Security Optimization

As part of our Managed Advanced Security Services and Security Advisory Services engagements, or as a stand-alone service, Sourcepass performs monthly vulnerability scans that identify, classify, prioritize, remediate, and mitigate vulnerabilities in IT environments. This ongoing process aims to provide critical insights toward maintaining compliance and reducing the risk of both internal and external attacks.

Assess, Report, Mitigate, Succeed.

The monthly scans allow for timely remediation of vulnerabilities, reducing the risk of cyber attacks and enhancing your overall security posture. Key business outcomes include:

- ☑ Identifing vulnerabilities as your IT environment changes
- ☑ Minimizing the potential impact of security incidents
- ☑ Streamlining security operations & improve overall security posture
- ☑ Allowing for management of risks before a vulnerability is exploited
- ☑ Helping your business adhere to regulatory compliance

Vulnerability Scanning & Management

1 — Identify Threats & Vulnerabilities

2 — Determine & Measure Risk Level

3 — Identify & Analyze Security Controls in Place

4 — Provide Recommendations to Reduce vulnerabilities

Remediate & Mitigate to Reduce Risk
